

Pratik Patil

Software Engineer (Backend), Java & Spring Boot, Django, Python, CI/CD, DSA & System Design

Pune, Maharashtra | impratikspatil@gmail.com | +91 9370438737 | [linkedin.com/in/pratikspatil007](https://www.linkedin.com/in/pratikspatil007) | github.com/impratikspatil

Summary

Backend Engineer with 1.7+ years of experience building and scaling backend systems. Experienced in designing high-performance REST APIs using Java, optimizing database queries, and integrating Redis-based caching and automating CI/CD pipelines. Strong foundation in Data Structures & Algorithms and system design, with a focus on scalability and performance.

Experience

Software Engineer	<i>PTC Software (India) Pvt. Ltd.</i>	<i>Jul 2024 - Present</i>
- Built a Central Server Manager (CSM) platform from scratch to replace fragmented server management workflows, designing scalable backend architecture and deployment pipelines used by 600+ engineers. - Optimized backend APIs and database queries using indexing and query tuning, improving system performance and maintainability by 30%. - Improved service reliability and debugging efficiency by implementing global exception handling, input validation, and structured logging (SLF4J), reducing issue resolution time by 30%. - Engineered transactional service layers using Spring's @Transactional and implemented pagination and sorting to efficiently process 10k+ records, ensuring data consistency. - Orchestrated server deployment and operational workflows using asynchronous backend processing, reducing manual effort by 20% and eliminating error-prone steps via a centralized CSM UI. - Developed CI/CD pipelines using Jenkins and GitLab CI, automating build and release workflows, reducing deployment effort by 40% and accelerating delivery cycles. - Accelerated infrastructure provisioning by leveraging Azure Marketplace VM images, reducing server setup time from 4-5 hours to under 30 minutes. - Developed an internal developer portal using Backstage to centralize automation workflows, microservices, and documentation, improving overall productivity and reducing context switching. - Implemented a Redis-based queuing system for asynchronous job execution, enabling scalable processing of deployment requests and enhancing system reliability.		

Software Engineer Intern	<i>PTC Software (India) Pvt. Ltd.</i>	<i>Jul 2023 - Jun 2024</i>
- Designed initial system architecture and API workflows for the CSM platform, reducing development ambiguity and enabling faster feature implementation. - Automated server health monitoring and cleanup of unused Azure resources using Python scripts, reducing manual effort and lowering infrastructure costs by 10% through elimination of idle resources.		

Android Developer Intern	<i>Memoneet Pvt. Ltd.</i>	<i>Dec 2022 - Jun 2023</i>
- Delivered features for an educational Android application with 1M+ downloads using MVVM architecture and Kotlin Coroutines. - Integrated WATI WhatsApp API and Firebase Analytics to automate campaigns and track user behavior, improving subscription conversions by 20% and campaign effectiveness by 40%.		

Projects

QuickServ Service Aggregator Platform	<i>2025</i>
- Built a full-stack service aggregator platform using Spring Boot, React, and MongoDB, enabling location-based service discovery with category filtering. - Secured APIs using JWT-based authentication and RBAC, ensuring controlled access to application resources. - Designed scalable RESTful APIs featuring Spring Data MongoDB, pagination, and filtering for server listings. - Enabled OAuth 2.0 (Google Login) to simplify onboarding and improve user sign-up experience. Indexed frequently queried MongoDB fields to optimize read performance for filtered service searches. - Deployed backend on Render and frontend on Vercel with environment-based configuration for a secure production setup.	

Technical Skills

Languages: Java, Python, C++, SQL
Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices Architecture, JWT, OAuth2.0
Databases: PostgreSQL, MongoDB, MySQL, Redis (Caching, Indexing, Query Optimization)
DevOps/Cloud: Azure, GitLab CI/CD, Kubernetes, Linux, AWS (EC2, S3)
Messaging & Async: Redis Queue, Event-Driven Architecture, Pub/Sub
Testing: Unit Testing, Integration Testing
Tools: Docker, Jenkins, Git, Postman
System Design: Scalable Systems, API Design, Caching, Load Balancing, Async Processing, Database Design. Core CS: DSA, OOP, OS, DBMS, Computer Networks

Education

Bachelor of Engineering in Computer Engineering	<i>2020 - 2024</i>
D.Y. Patil College of Engineering, Pune	CGPA: 8.99/10.0

Achievements

Flipkart GRID 4.0: Ranked in the Top 5% nationwide out of thousands of applicants in one of India's largest engineering challenges. Achieved CodeChef rating of 1680 and Codeforces rating of 1260, solving 500+ DSA problems.
